

Planning Committee Minutes for 12 Sept 2013 meeting

Planning Committee members present: Larry Chappell, Skip Johnson, Steve Masalin, Larry Williamson & Mark Austin

The planning committee met with Dave Atkinson to discuss the entire phase 2 design. We asked Dave to draw the entire phase 2 with the phase 2A design incorporated so we can see how the changes in design would affect the rest of the building.

Dave will incorporate into the plans a roof design that allows the phases added to the left and right to tie into the side wall and not the roof. The peak will run the depth of the building instead of the width and the height will be increased enough to allow the other peaks to be lower than the phase 2A peak. He will also maintain a 10 foot ceiling height on the first floor of all of phase 2 and on the second floor, a 9 foot ceiling height in phase 2A and 8 feet in the other phases. We also asked the second floor to be at one level with the only stairs or ramp going to the current auditorium Balcony. Dave will also see if he can add 4 feet to the depth of the second phase and try to determine the height needed for the second floor truss design to allow us have an overall height.

Dave will incorporate more storage space in phase 2A by installing vanities under the sinks for cleaning materials, designing a closet in the conference room and a storage closet at the top of the stairs. He will also spend time looking at the current laws concerning young children on the second floor and the requirement that a building greater than 9,000 square feet or greater than 300 occupants is required to have a fire suppression system.

We asked Dave Atkinson to look into the requirements for a tornado shelter and to consider access to all attic space in the design of phase 2. There was renewed excitement about the next phase of our building project at the end of the meeting. We did not want to put pressure on Dave to get the work done since he has been so amiable with us during this project. We are hoping that we will have something to present to the church by the end of the year to renew the churches excitement about what God can do through us in the building of this next phase. This next phase will allow us to have all our children in the same building and have Saturday night refreshments in the new building.

If you have a comment or concern about the building, please talk to an Elder or a Planning Committee member to have it addressed. The Planning Committee members are Mark Austin, Larry Chappell, Skip Johnson, Andrew Krajec, Steve Masalin, and Larry Williamson.
